

Ecobus Actor B-6J / B-8J
Decentralized office actuator
 for 6 or 8 blinds

Product Information

Application

The Ecobus EIB Office Actuator B-6J or B-8J permits control of 6 or 8 Venetian blind drives independently of each other. Functions of the blind drives - UP, DOWN and stepwise slat adjustment / Stop; OPEN, CLOSE. Power supply via Ecobus EIB.

Depending on the chosen application, the following functions can be set or selected using the parameterization software:

- stop time for change of direction
- monitoring time for wind sensor
- safety in case of wind alarm
- run time of the blinds
- impulse time for slat adjustment

Technical Properties

Output	6 or 8 independent channels
Rated voltage	230 V AC + 10 / - 15%, 50 Hz
Switching current	6 A
User and display components	LED and button for entry of the physical address.
Type of protection	IP 20 in accordance with EN 60 529
Operating temperature range	- 5°C to + 45°C

General Properties

Mounting	on wall surface / in ceiling or floor.
Connection	matching Ecobus connection cable beginning on page E-35

Other design and function versions are possible.
