

Product information

Application

Used to form four pin connection of data rails within a distribution box or to connect external bus cables to the data rails. Bus and power supply are connected via bus connection terminals or connection terminals. Due to its small dimensions, the connector fits under the distributor cover. In conjunction with the SV/A 30.640 power supply, it is possible to use the 29 V DC output fed through the connection terminals to power an additional line (e.g. main line).

Technical Properties

Protection method	IP 20 in accordance with EN 60 529
Connection	
Bus line and power supply	2 connectors each for connector terminal
Data rail	Pressure contacts on data rail

General Properties

Assembly	35 mm rail, DIN EN 50 022
Dimensions (H x W x D)	90 x 18 x 43 mm
Assembled depth / width	68 mm / 1 module at 18 mm
