

TAD E30

Product information

Application

Branch and terminal boxes for tunnel lighting. Tested on the basis of DIN 4102-12, circuit integrity class E30.

Goods supplied

Ceramic feedthrough terminals 6x6mm², 2 6-pole N and PE snap plate, 1 fused terminal block 1A/6mm², incorporating prewired light connection jacks, 2 PG 21 cable tightening screws, 1 M12 V2A external grounding screw, V2A mounting strips. Order fire protection plugs separately, depending on anti-corrosion protection requirements.

Function

Branch boxes for safety lighting in large areas, such as tunnels. The power supply is not affected by a short circuit on a light in the case of fire, as the light exit is fused in the branch box.

Technical Data

Material	Polyester housing
