

# DIN Rail Adapter IP20 for MS 1/8 modules

## Product information

### Application

#### DIN Rail Adapter IP20 for MS 1/8 modules

The DIN rail adapter takes up a MS1/8 RJ45 module (MS1/8 module is not part of the delivery) and enables the mounting of a RJ45 socket on a DIN rail TH35. The MS 1/8 module is protected by a cover against direct contact.

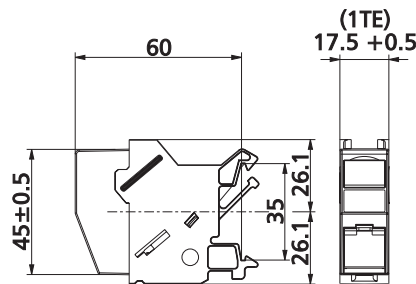

The width of 1TE makes the installation of up to 12 modules in standard electrical distributors possible.

With installation as equipment of the protection class system I, the earthing is made directly by means of an integrated earthing spring by the DIN rail. The DIN rail has to be attached in this case over appropriate contacting clamps at the earthing of the building .

### Description

- Mounting on DIN rail TH35 (in accordance with DIN EN60715)
- 1TE (< 18mm) width (DIN 43880)
- Integrated earthing spring (removable)
- Colour light grey (similar to RAL 7035)
- Protection class I or II, depending on mode of installation
- Protection class IP20
- Protective window for labeling strips
- Integrated dust protection cover
